

Ruby on Rails Developer (Linux Server Admin Focus)

Company: Aloha Condos

Location: Remote (Must support HST & PST time zones)

Job Type: Part-Full Time | Contract or Permanent

About Us :

Aloha Condos is a trusted platform providing vacation rental solutions across the Hawaiian Islands. We're currently seeking a skilled **Ruby on Rails Developer** with **Linux server administration** experience to support, maintain, and evolve our backend infrastructure.

Tech Stack

We work with the following technologies:

- **Ruby on Rails (RoR)**
- **Ruby** (and a range of gems)
- **PostgreSQL**
- **Apache**
- **Passenger**
- **Red Hat Linux**
- **SOAP/XML/REST APIs**

How You Would Contribute

- Develop, maintain, and support Ruby on Rails applications and related APIs (RESTful & SOAP).
- Manage and administer Red Hat servers including Apache, Passenger, and systemd services.
- Perform regular security patching, automated backups, and log monitoring.

- Tune and optimize PostgreSQL and Apache configurations to ensure top-tier application performance.
- Integrate complex XML/JSON data feeds with third-party services.
- Ensure server uptime, reliability, and performance through proactive monitoring and maintenance.
- Provide support during U.S. time zones (primarily HST and PST).

Required Skills & Experience

- Hands-on experience with **Ubuntu Linux server administration**.
- Proven track record of **delivering and maintaining Ruby on Rails applications**, particularly with API integrations.
- Deep understanding of **RESTful** and **SOAP/XML** API design and implementation.
- Experience tuning **PostgreSQL** and **Apache** for production performance.
- Strong understanding of application and server-level security practices.
- Comfortable working independently and handling production issues

Preferred Qualifications

- Experience with automated deployment tools (Capistrano, Ansible, etc.)
- Familiarity with server monitoring and alerting tools.
- Background working with property management, hospitality, or booking platforms.

Why Work With Us?

- Small, agile team with direct impact on the business.
- Flexible work hours, remote work environment.
- Stable and long-term opportunity with a mature platform.

To Apply:

Please submit your resume, a short cover letter, and links to any relevant work (GitHub, portfolio, etc.).
